

# Advanced Credit Report Analyzer

Upload your credit report as a PDF or text file (max 10MB). The tool will scan for common errors like inaccurate accounts, outdated information, duplicates, or specific late payments. Results are displayed with color-coded tags, estimated score impacts, and suggestions. Premium export/history would require a backend.

**Upload Credit Report (PDF or TXT):**

No file chosen

**Analyze Report**

**Disclaimer.** This automated analyzer relies on heuristic text-parsing and probabilistic inference. Output can be incomplete or imprecise due to idiosyncratic layout variations, OCR artifacts, non-standard encodings, redactions, and pagination drift. Treat the findings as decision support only and corroborate them against your source report. This **beta** model is presently calibrated for **Experian** consumer disclosures; support for additional bureaus is forthcoming.
